Excerpt from a letter by 'Ali Hamzah Bin-Ahmad Bin-Sulayman al-Bahlul to Khalid Shaykh Muhammad, written at his cell number 102G – Camp 6, and dated 24 JUL 2004, 9:05 AM

Mukhtar al-Balushi, I say to the future presidents of America who are the heads and leaders of the West, in spite of Europe's union, I say to them: "Possession of weapons of terror which you scare leaders of nations in the United Nations with, and make them believe they have sovereignty over their nations, doesn't scare us nor does it terrorize us because each mujahid for the sake of Allah has the ability to face any type of military confrontation, whether it is like the previous Russian way (fight against Muslims openly and bravely,) or the Americans and their allies' way (an ambiguous, less confrontational and more of deceitful and malicious battle). No mujahid fears Allah in what others say. Essentially, each one is a mobile terror weapon. Do you have any thing like that? I challenge you; you will not be able to stop jihad even if you kill everyone in Cuba or even if everyone in Cuba renounced their faith. Do you know why? Because Muhammad, peace be upon him, said: "Horror is a trait of the nation of Muhammad; Allah instills terror in the heart of every infidel and unbeliever, and you are the heads of apostasy and infidelity on earth, whether you lean towards faith like Bush, or to the new faith – democracy.

In spite of their ferocity and barbarism, the Russians are much braver than you, we consider you to be more like scum. To me, a person who honestly faces me in a battle to either kill me or to kill him is better than a hypocrite who brings me a doctor to treat me but tortures me instead, or a pleasant politician who is a scum.

As the demised dictator infidel al-Sadat [TC: Former Egyptian president who was assassinated] said about his American infidel masters: "Americans are pleasant and friendly, but they are insidious!" And you have not shown any thing new.

Muhammad, peace be upon him, informed us of the types of our enemies and described each type. Praise be to Allah, we have what it takes to remove the cancer form the body of our Islamic nation, if not today, tomorrow - God willing.
